

# Jasmine - 1

Saturday, 24 April 2021

19:05

## Unit Tests

- Testing individual units of code
- Unit is the smallest testable part (function)
- Trust changes you make on existing (already tested) code
- Code quality
- Changes occur quickly
- Documents your own code
- Automation

## Jasmine

- Comes out of the box with everything you need to test your code

-----

**const**

**let**

=> es2015 / es6

EcmaScript

var myVariable;

-----

**() => {}** // Arrow function expression

**function() {}**

-----

Async / await -> es2017

-----

## **Spec file extensions**

\*.spec.js

\*.test.js

Spec === test

.js -> javascript files

.ts -> typescript files

(target file name).spec.js

calculator.spec.js
